HIGH VOLUME FULL RANGE PRESSURE COMPENSATING VARIABLE FLOW CONTROL

FEATURES:

- PRECISION GROUND PLATED SPOOL that assures long life.
- **D**IAMOND **H**ONED **S**POOL **B**ORE provides consistent spool fit with low leakage.
- EVERY FC IS TESTED for shutoff, linearity, and pressure compensation.
- STANDARD **3**-PORT allows for pressure compensated flow out of two ports.

SPECIFICATIONS:

- See flow chart for capacity.
- Rated for 3000 psi (207 bar).
- Weighs 28 3/4 lbs. (13.0 kg).
- 30-Micron Filtration Recommended.
- Torque to turn side lever spool.
 - 40 in*lbs with 3000 psi on CF port.
 - 40 ft*lbs with 3000 psi on EX port.

MATERIALS:

- Ductile Cast Iron Body.
- Heat Treated Steel Spools.
- Buna N O'Rings.
- Consult factory for stainless steel rotary spool.

FC - GENERAL INFORMATION

The Brand, full range pressure compensating variable flow control is designed so that the orifice area varies as the lever is rotated. Fluid travels past the variable orifice, by the compensator spool and then out the controlled flow port. Therefore the flow out of the CF port is proportional to the orifice area which can vary from closed to wide open. The sum of the controlled flow and the excess flow equals the inlet flow and as the controlled flow increases the excess flow decreases. Both outlet flows are pressure compensated with a spool that maintains a constant flow while adjusting for pressure. Hunting between the compensated pump and our valve is dampened with a cross hole in the casting. Thus, the outlet flow is smooth and constant regardless of the pressure on the CF and EX port.
